

AgentDebug: complete result history on the four principal evaluation scopes

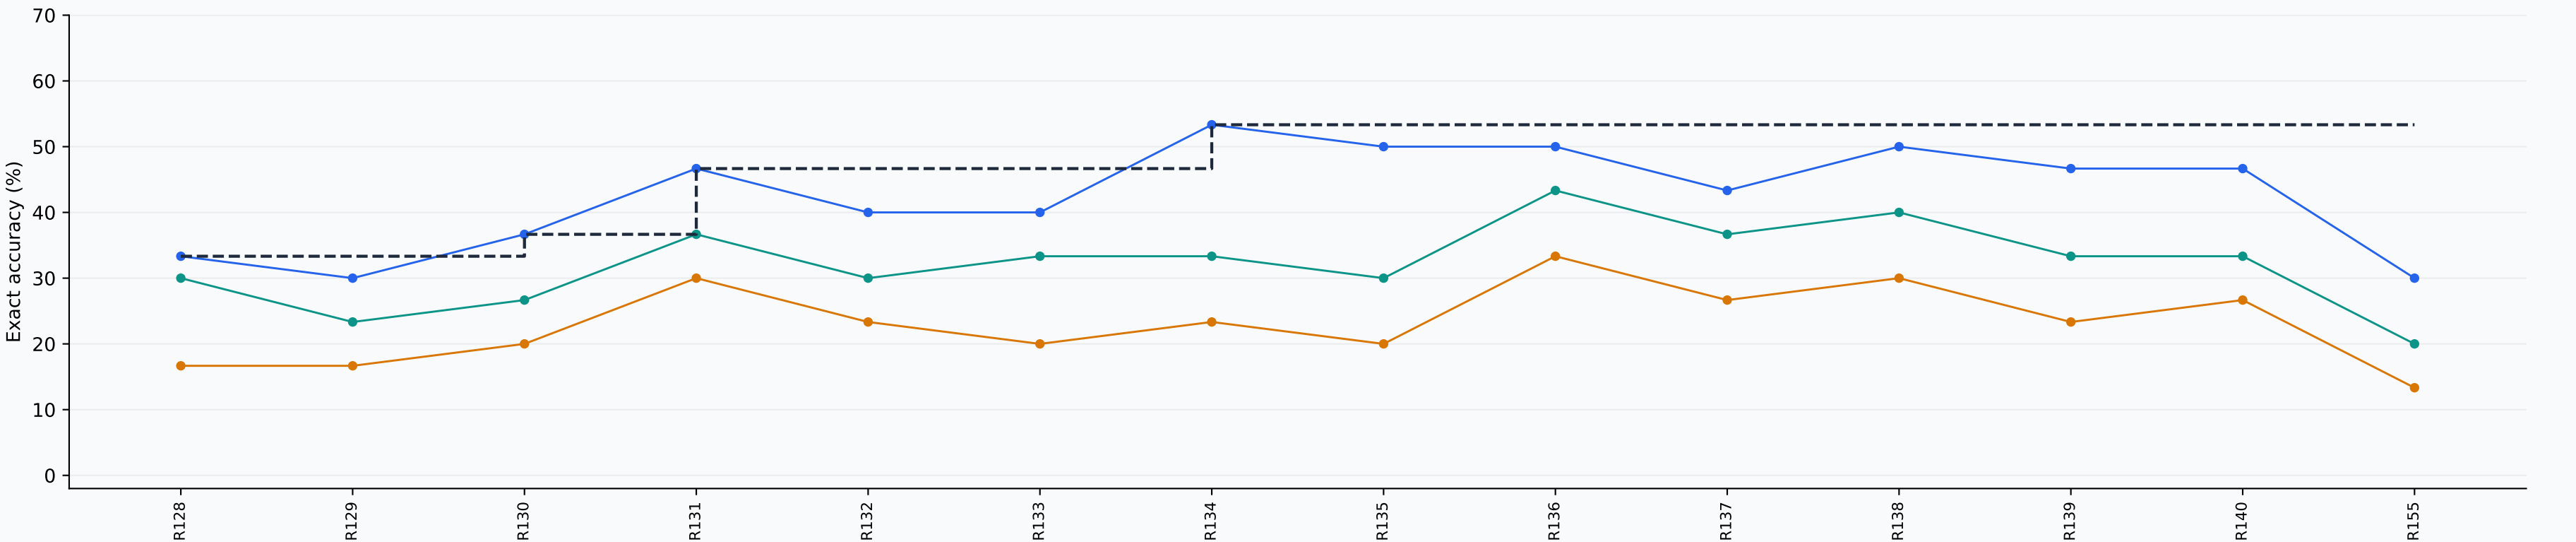

Initial full-release reproductions (200) | 4 scored run-method records

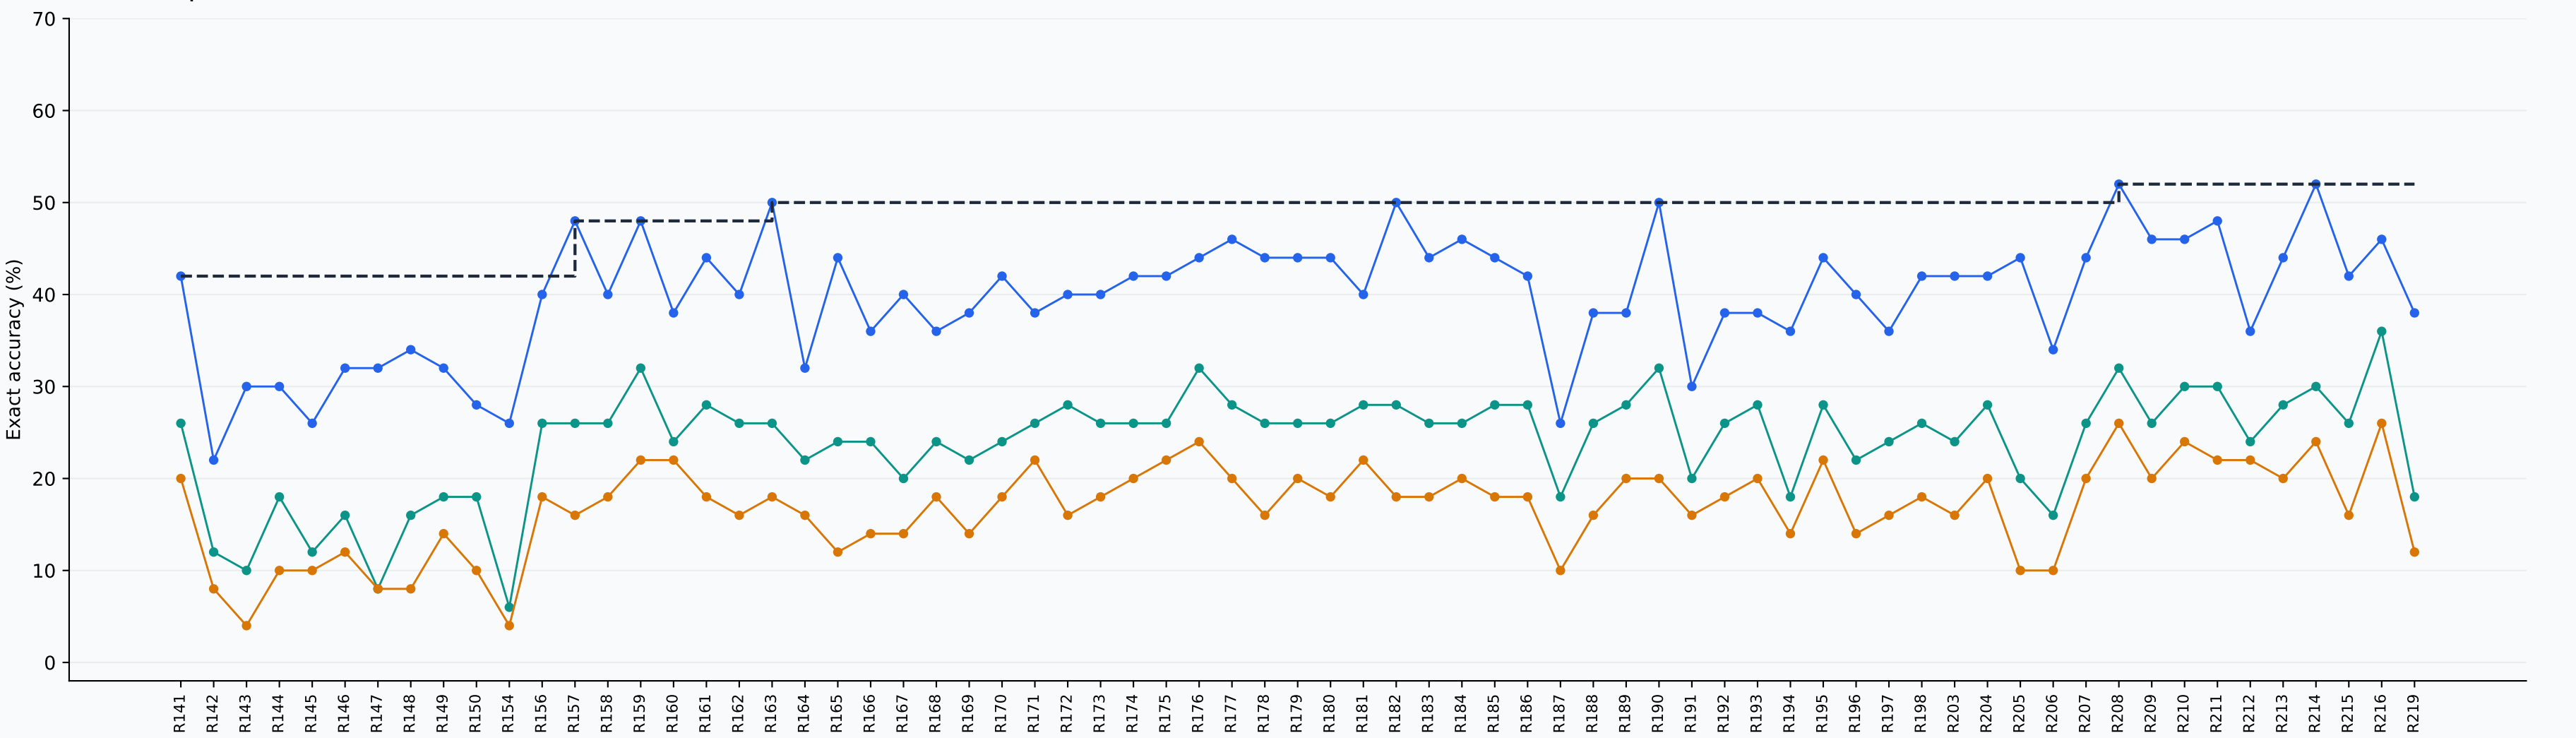

Mixed tuning-v1 (30) | 33 scored run-method records

GAIA-smoke-30 | 14 scored run-method records

GAIA-50 | 69 scored run-method records

Archive ID in result-recording order; IDs resolve to full configuration in full-history.md
Red x: failed outputs retained as zero. Cross-model points are descriptive, not isolated architecture effects.
